1 July 2002

Mr Garry Stevenson
Properties Officer
NSW Department of Education and Training

Dear Garry,

I refer to a recent telephone conversation with Mr Ashley Forbes who is with the Water Conservation Services. Mr Forbes has requested comment about the toilet system in place at our school, in particular my opinion of its reliability and aspects of water conservation.

Our school was completed in August 2000 with students and staff occupying the site on the 22nd of that month. The system referred to appears to be functioning well, with little or no noticeable failures in operation and requiring little or no maintenance to date, with the exception of loud water hammer noise being heard in the adjacent classroom. This problem has been quickly rectified and has not been observed to occur since, a period of well over 12 months. As far as minimising water consumption is concerned, it is difficult to provide comment in comparative terms, as there is no available data to draw any conclusion.

I would be pleased if you would pass this letter on to Mr Forbes.

Yours faithfully,

Laurie Connery
Principal
